

AJAY NONIA

QA Automation Engineer

✉ ajaynonia1803@gmail.com | 📞 +91 8122449882 | 💻 [GitHub](#) | 🌐 [Portfolio](#)

PROFESSIONAL SUMMARY:

Lead QA Automation Engineer with **5.5+ years of experience** in software testing and test automation, specializing in **Investment Banking & Trading applications**. Strong expertise in designing scalable **UI, API, and end-to-end automation frameworks** using **Playwright, TypeScript, Selenium, Java, REST Assured, and Cucumber BDD**. Experienced in **Agile/Scrum, CI/CD, test strategy, framework development, complex business validations, and T+1 settlement workflows**. Leverages **Generative AI tools** such as **GitHub Copilot** and **TestGen** to accelerate automation development and improve test coverage.

TOOLS & TECHNOLOGIES:

- **Automation Tools & APIs:** Playwright, Selenium WebDriver, REST API Automation
- **Languages & Libraries:** TypeScript, Java, JSON
- **Version Control:** GitHub, Bitbucket
- **Databases:** MySQL, MS SQL Server, Mainframe
- **Build Tools:** Gradle, Maven
- **IDEs:** VS Code, IntelliJ IDEA
- **Bug Tracking:** JIRA, X-Ray Repository
- **CI/CD Tools:** Jenkins, TeamCity
- **Frameworks:** Cucumber (BDD), JUnit, TestNG (TDD), Data-Driven, Page Object Model(POM)
- **Domain Expertise:** Investment Banking, Trading
- **Generative AI Tools:** GitHub Copilot, TestGen, AIOMS

EDUCATIONAL QUALIFICATION:

- B.Tech in Electrical and Electronics Engineering
Bengal College of Engineering & Technology, West Bengal

PROFESSIONAL EXPERIENCE

Synechron Technologies Pvt. Ltd. – *Lead Quality Analyst (Automation)*

Aug 2022 – Present | Client: Morgan Stanley | Domain: Investment Banking & Trading

- Designed and executed **E2E automation strategies** for complex trading and wealth management applications
- Developed and maintained **Playwright + Typescripts automation frameworks** (BDD, POM) and generated detailed execution reports using **Allure Reports**
- Specialized in leveraging **GitHub Co-pilot** to accelerate test script development and reduce manual coding effort.
- Designed and generated high-quality test cases using **TestGen AI and AIOSM**, ensuring comprehensive coverage of functional and edge scenarios.
- Developed and maintained **Selenium + Java automation frameworks** (BDD, POM, TestNG)

- Automated ~**80% REST API test cases** using REST Assured
- Conducted automation reviews with **POs and Tech Leads** and prepared automation dashboards
- Integrated automation suites with **CI/CD pipelines (TeamCity)** and managed code via **Bit bucket**.
- Managed test cases and defects using **JIRA & X-Ray**
- Actively participated in **Agile ceremonies** (stand-ups, sprint planning, retrospectives)
- Delivered regular **sanity, sprint closure, and productivity reports**

Shyam Steel Industries Ltd. – Assistant Engineer
Oct 2020 – Feb 2022

- Performed **functional and system testing of PLC-based control systems**, validating machine sequences, control logic, and expected process behavior.
- Designed and executed test scenarios for **PLC I/O signals, interlocks, alarms, fault conditions, and recovery workflows**.
- Performed **integration testing between PLC, HMI, and connected systems**, validating data communication and control signals.
- Debugged and analyzed **PLC logic and test failures**, identifying defects and collaborating with engineering teams to resolve issues.
- Conducted **end-to-end validation of automated industrial processes**, including positive, negative, boundary, and exception scenarios to ensure system reliability.

Language: English, Hindi, Bengali

Personal Skills:

- Strong analytical and problem-solving skills
- Effective communicator in cross-functional teams
- Adaptable and quick learner of new technologies

CERTIFICATES AND ACHIEVEMENTS:

- Microsoft Azure Fundamentals certified (AZ-900)
- Diploma in Computer Application
- Awarded for Project Application Delivery in Trading Domain.
